INTRODUCTION

If someone had asked me a few years ago what career I wanted, I probably wouldn't have said Data Science. But during my Bachelor's in **Electronics and Telecommunication Engineering from Savitribai Phule Pune University (SPPU)**, I discovered something I genuinely enjoyed—working with data, solving problems, and finding patterns that help make better decisions. That curiosity slowly became my career goal. I am now preparing for a master's degree in data science and seeking opportunities to turn that curiosity into meaningful, real-world impact.

EDUCATION

in Bachelors Electronics & Telecommunication Engineering [2022-2026]

(Preparing for a master's in data science) [University of Bristol] [2026-2027]

SKILLS

Data & Analytics: Data analysis, predictive analytics, data visualization, machine learning fundamentals

Cloud & AI: AWS Redshift, Amazon S3, AWS Glue, AWS Lambda, AI tool fluency

Professional: Leadership, management, team collaboration, problem solving, communication

EXPERIENCE

1) Data Analytics Intern · Data Universe

Nashik, Maharashtra

Nov 2025 - July 2026

- & Completed a 9-month data analytics internship, contributing to project work and developing hands-on experience in data preparation, analysis, and problem solving.
- & Built a cloud-based data warehouse using AWS Redshift, integrating source data through Amazon S3, AWS Glue, and AWS Lambda.
- & Demonstrated commitment to learning, adaptability, teamwork, and ownership while contributing to data analytics projects.

PROJECTS

1. Cloud Data Warehouse using AWS Redshift

Designed a cloud data pipeline from MySQL source systems to Amazon Redshift using S3, Glue, and Lambda for scalable analytics-ready storage.

2. Student Prediction System

Built a predictive analytics project to analyse student data and identify academic outcomes where earlier support may be helpful.

3. Fraud Detection & Customer Churn Analysis

Analyses behavioral and transaction patterns to identify potential fraud signals and understand factors associated with customer churn.

4. Economic Data Analysis & Sales Dashboard

Explored economic indicators for trends and created a dashboard to make sales performance metrics easier to

monitor and act on.
